

Advantages:

- Slip-proof mounting via clamping screw with locknut to bulb profile
- Lower time requirements for mounting compared to conventional mounting options due to single screw connection
- Subsequent mounting possible without any damage to coating after completion of "hot work"
- Lightweight design to meet constantly growing demands in terms of weight reduction
- High load handling of up to 4.5 kN

HP-clamps for M8 and M10 threaded rods and HP-Profile 80 – 120 and 140 – 180

The HP-Clamp is the high-speed solution for simple mounting to holland profiles on ship structure without welding. It is suitable for direct, flexible mounting of metric M8/M10 threads to any desired position on the bulb profile and can be combined with MPC-Support channels for multiple pipe support systems.
